Install Chrome in Windows Server using Powershell

Follow the steps to install chrome

This website uses cookies to improve the experience of our visitors. Read more (<https://www.snel.com/privacy-statement/>)

The default browser of windows server is Internet Explorer. By default this blocks all connections which can make it hard

Ok, do not show again

to browse through the internet. You can follow these easy steps to install chrome which will be much easier to work with.

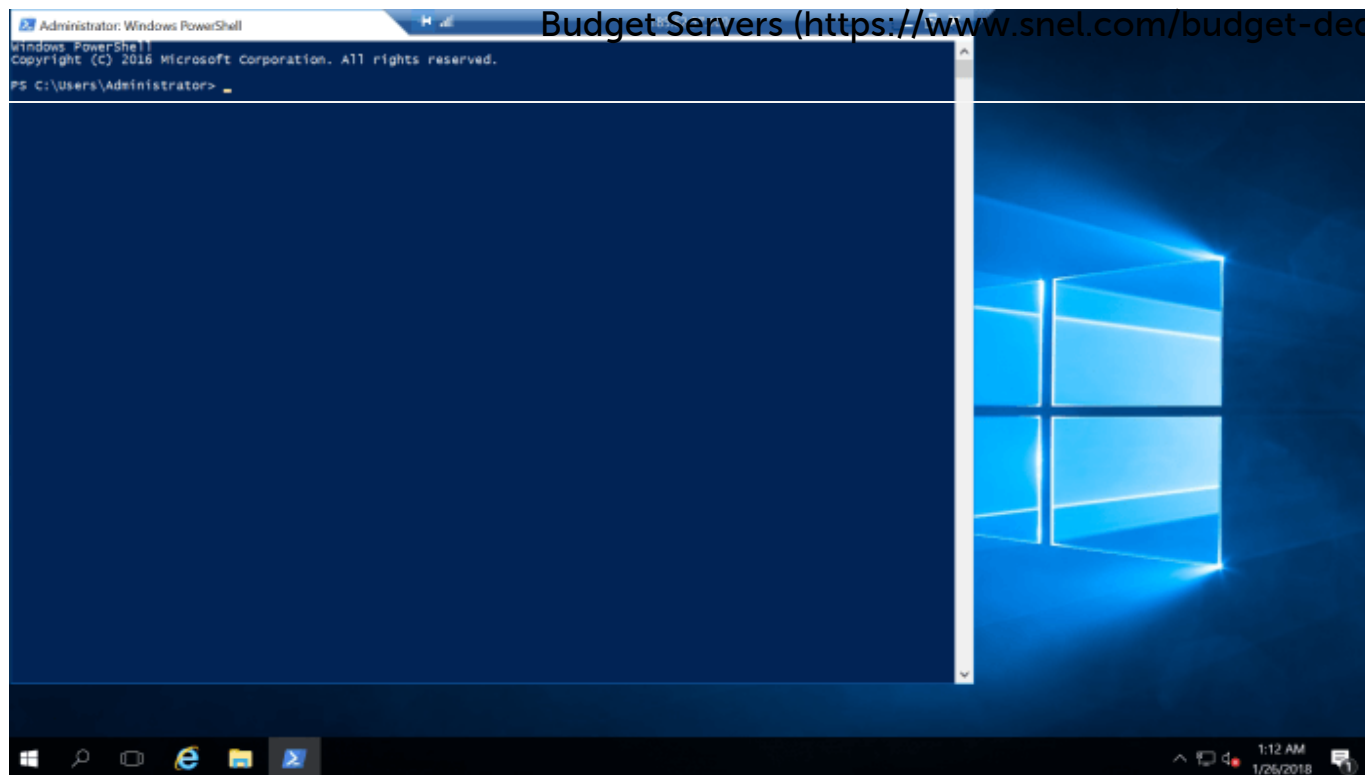

Snel Workspace (<https://www.snel.com/workspace/>)

This script does not work. It gives the wait message once and then the Verbose message, but nothing is actually installed. I am running on windows 10 with an HP EliteBook x360 830 G6
