of using O&O AppBuster is that it can  
t have been removed. If you accidentally  
:ing it back is going to be easy.

**Remove stock apps**

**Download** O&O AppBuster and run it. Wait for the list to load that you want to uninstall. If you scroll will see that the apps are divided into one of which is Hidden. This category is that are essential system apps.

Do not uninstall them but make sure that you have a backup point because uninstalling a Hidden app can cause problems for you. After selecting the app, click the Uninstall button.

Confirmation dialog and a dialog asking if the app for a single/current user, or for all users.
