I have the same problem with Windows 7 on a VM (VMware). On Windows 10 everything works fine. 03.04.2018:...

Request: add keyboard shortcut for "Open with Editor" or add "first line" column to File search results view

 [Stefan Kueng](#) posted [a comment on ticket #515](#) 1 year ago

Adding Shortcut Ctrl+O to open selected items with the editor.

Excellent product. A pity: that Zero-width lookbehind assertions only work on fixed length expressions. Love that you can not only refer to named subpatterns by their matching result (`${name}`), but also by their expression (`?&name`).
