In the Cortana Search bar next to start button, type change text size. You'll see a Monitor outline appear with Make Text Bigger. Click on that.
Settings > Ease of Access > Display does have the slider to change text size.
This has been there in earlier builds. I'm on build 1809.

Perform a PC Refrsh. This will keep your files but it will be necessary to re-install applications you've downloaded or installed from DVD.

Click Start > Settings

Select Update & Security

Select Recovery

Click on Reset option

Choose to keep your files or you can perform a clean installation by keeping nothing.

Didn't you say you have 1803 version? The current version is 1809.

Right click on Start > Select PowerShell (Admin)
Run the following scans then verify if the feature has reappeared in Settings
> Ease of Access > Display.

DISM.exe /Online /Cleanup-image /Scanhealth

DISM.exe /Online /Cleanup-image /Restorehealth

Conclusion - the feature is not available on your display.

You'll see this note in "Make Text and Other Items on the Desktop Larger" section
Note: This might not be available for some displays.
